**DETAILED ACTION**

***Allowable Subject Matter***

Claims 23-35 and 38-39 are allowed.

The following is an examiner's statement of reasons for allowance:

With regards to independent claim 23, the prior art of record, specifically the Jacobs reference does not teach a flow rate measuring unit as described in the claim including the heating unit and controlling unit for the heating unit. The Lagergren and Maresca references fail to provided teaching or motivation for this limitation as well. The Lagergren references teaches a structure similar to the claimed invention in form, however still fails to provide the flow-rate measuring unit as claimed. The same is true for the Maresca reference which only teaches the attachment means for locating the probe within the tank under test. The same applies to independent claim 25 and the heating structure claimed.

With regards to independent claims 24, 28, 38 and 39, the Jacobs reference fails to teach a "liquid retaining portion including a space configured to retain liquid flown into to the leak detector", wherein the liquid flown into the leak detector is part of the liquid in the tank. The prior art further fails to teach alone or in combination fails to teach the structure with a flow path calibrating unit configured to calibrate the measuring unit under a closing operation of the flow path opening/closing unit. The flow path opening/closing unit is further absent from the references of record, especially when

Art Unit: 2856

used in combination with a controller for providing an opening or closing operation to the control flow through the flow path capillary.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
